

Bergara, 2010-01-12

Ms. Maria Fremlin.

Dear Madam:

We are pleased to send you some data and images of this pyramid built in the town of Bergara in the Basque Country.

The website that you lead, provides really interesting information from us; we have raised awareness to the City Council to install a pyramid dedicated primarily to promoting *Lucanus cervus* and other saproxylic organisms.

The assembly has been made recently in an area intended for the recovery of biodiversity in Bergara. It has enjoyed the cooperation and support of citizens, the environmental group Mendia Bizirik and municipal technicians.

Thank you very much and a warm greeting

Hugs,

*Pol-Pol Bizirik Mendia M.T.*
